

YOUR HAIR COMPANY

Digital Product & Customer Experience Strategy

Research, product plan and prototype for a doctor-led hair-care platform — website, consultation, Doctor Portal, sales CRM and WhatsApp retention.

PREPARED FOR DR. TYAGI · FOR REVIEW & APPROVAL · OCTOBER 2026

PROJECT VISION

One doctor-led system, from first ad to fifth reorder

Every consultation should end in a personal plan. Every plan should start a relationship that lasts the full course of treatment.

Convert

Turn leads into paid ₹500 consultations with a booking flow that shows real slots before it asks for anything.

Prescribe & sell

Dr. Tyagi recommends a plan inside his portal; the customer pays for it in one tap on WhatsApp.

Retain

Follow-ups, refill reminders and subscriptions keep customers on the plan long enough to see results.

BUSINESS MODEL

Four revenue moments in one loop

1 • Consultation

₹500 paid video consultation with Dr. Tyagi. Recommended: credit the ₹500 against a plan bought within 7 days.

2 • Personal plan

Doctor-recommended products, dosage and duration — sent as a ready-to-pay plan.

3 • Product plans

- 1 month — ₹5,999
- 2 months — ₹10,999 (₹5,500/mo)
- 3 months — ₹14,999 (≈₹5,000/mo)

4 • Retention

Refill reminders, one-tap reorder, optional UPI AutoPay subscription and follow-up consultations.

PLAN SAVINGS VS MONTHLY

2 months saves ₹999 (8%) • 3 months saves ₹2,998 (17%)

Results backed by a money-back guarantee

YHC costs more because the risk sits with us, not the customer: follow Dr. Tyagi's plan, and if it doesn't work, get your money back.

The promise

Refund of [__% / plan amount] if there is no visible improvement after [__] months of following the prescribed plan.

Exact terms to be set by Dr. Tyagi and reviewed by counsel.

Tracked automatically

- Plan start = delivery date
- WhatsApp routine check-ins logged
- Monthly progress photos
- Follow-up consult completed

Claim flow

- Customer taps "Claim guarantee"
- Eligibility shown instantly
- Dr. Tyagi reviews the photos
- Refund via Razorpay; CRM updated

Rules

- Terms shown beside every price
- Same words on site, checkout, WhatsApp
- No hidden conditions in fine print

TARGET CUSTOMER JOURNEY

The complete journey, A to Z

Traya proves the model — and its cost

₹338 Cr

FY25 operating revenue

Up 43% on FY24's ₹236 Cr

8 lakh+

Customers served

70% from non-metro cities

56%

Repeat user ratio

Reported by the founder in 2025

₹22.5 Cr

FY25 net loss

Growth driven by heavy marketing and staff costs

Lesson: people pay for hair treatment month after month when someone guides them. Human follow-up is the retention engine — and the cost to control.

COMPETITOR LESSONS

What they do, why, and where we can do better

Traya

Free hair test → doctor-prescribed kit → hair coach

WHAT WORKS

A free test removes the entry barrier; coaches keep users going through the early months.

WHERE IT FALLS SHORT

Most users talk to a coach, not the doctor. The doctor feels distant.

Man Matters

Free assessment → stage-based kits → 3–6 month plans

WHAT WORKS

Stage kits make choosing simple; longer plans cost less per month.

WHERE IT FALLS SHORT

Discount-led and mass-market. Hard to read as premium or personal.

Hims (US benchmark)

Online assessment → prescription → subscription

WHAT WORKS

Subscription by default, with pause and skip; clear pricing per product.

WHERE IT FALLS SHORT

Care is mostly asynchronous messaging, with little human relationship.

Our space: a live consultation with the doctor himself, his plan one tap away on WhatsApp, and a money-back guarantee that makes the higher price a safe choice.

COMPETITOR COMPARISON

Priced like a clinic, backed by a guarantee

	Traya	Man Matters	Hims (US)	Derm clinics	YHC (proposed)
Doctor consult	Optional, ₹499	Free	Async, often bundled	Paid, in person	₹500 live video, Dr. Tyagi
Monthly price	₹1,500–3,000	₹839–1,399 (plans)	\$15–60	₹6,000–10,000+ *	≈₹5,000–5,999
Guarantee	Not found in our research	Money-back on plans (T&C)	Not found in our research	Not checked	Money-back guarantee
Ongoing support	Hair coach	Coach + follow-up consults	Provider messaging	Next appointment	Doctor + WhatsApp care team
Retention engine	App and coach-led reorders	3–6 month plans	Auto-renew, pause or skip	Manual	Refill engine + UPI AutoPay

* Clinic range is Traya's own comparison. Sources: traya.health, manmatters.com, hims.com

BRAND & VISUAL DIRECTION

Silver, white and metallic black — clinical, not cold

Metallic sheen comes from gradients and photography — never from glitter or chrome effects.

Aa

Cormorant Garamond — headlines, quiet luxury

DM Sans — interface, prices, body text

- **Calm and clinical:** generous white space, one idea per screen
- **Evidence over hype:** ingredients, process, doctor credentials
- **Real people:** consented photos, no stock models

WEBSITE SITEMAP

Five doors from one homepage

Home — with Book Consultation and Free Assessment always one tap away

Shop	Consult	Learn	My account	Company
All products	How it works	Hair concerns	Dashboard	About YHC
Product page	Book consultation	Ingredients & science	My plan	Contact & support
Treatment plans	Meet Dr. Tyagi	Blog	Orders & tracking	Privacy · Terms
Cart	Free hair assessment	Real stories	Consultations	Refund · Shipping
Checkout	Consultation FAQs	FAQs	Reorder	Medical disclaimer

Ten sections that answer every buying question in order

01	Hero Promise, doctor photo, Book Consultation + Free Assessment	06	Treatment plans 1, 2 and 3 months with per-month price
02	Trust strip Dr. Tyagi's reg. no., ratings, delivery, secure payment	07	Ingredients & science What is in it and how it works
03	Hair concerns Pick your concern: thinning, hairline, hair fall, scalp	08	Real stories Consented reviews; results vary note
04	How it works Book → Consult → Plan → Delivered → Follow-up	09	FAQs Cost, timelines, side effects, refunds
05	Meet Dr. Tyagi Credentials, approach, short video	10	Final CTA + footer Book now · policies · medical disclaimer

First screen: the doctor, the promise, one clear action

Above the fold

- Doctor's face, not a model
- One primary CTA with price shown
- Reg. no. visible on first scroll

Motion

Slow fades and a soft metallic light sweep. No carousels.

Sell the plan, explain the product, never overpromise

Product page anatomy

- Gallery: pack, texture, in-hand use
- Plan selector: 1 / 2 / 3 months with per-month price
- “Recommended by Dr. Tyagi” label on plans
- Ingredients and what each one does
- How to use, and what to expect by month
- Reviews (consented) and FAQs

Selling rules

- Lead with the consultation: plans are personal
- Show total and per-month price together
- Guarantee terms beside every price
- No “cure”, “100%” or guaranteed timelines
- Every claim backed by data on file

Decision for Dr. Tyagi

Can products be bought without a consultation? Prescribed dosage suggests consultation first; non-prescription items (e.g., shampoo) could be sold directly.

Recommended: consultation-first for treatment plans, open purchase for care products.

CONSULTATION FUNNEL

Show the time first. Ask for details later.

Step	Customer does	System does
1	Taps “Book consultation”	Opens booking; no form yet
2	Sees today, tomorrow and later slots	Live availability from Dr. Tyagi’s calendar
3	Picks a slot, enters mobile + OTP	Holds the slot for 10 minutes; lead saved in CRM
4	Adds name, age and main concern	Short form only — 3 fields
5	Pays ₹500 (UPI, card, netbanking)	Razorpay checkout; webhook verifies payment
6	Sees confirmation; gets WhatsApp + email	Slot booked; Doctor Portal and CRM updated
7	Completes intake and uploads scalp photos	Detailed history before the call; reminders if missing

Answer to “form before or after the slot?” After. Choosing a time is a commitment; a long medical form before it loses people.

One calendar, rules set by the doctor

Dr. Tyagi configures

- Working days and hours, breaks, holidays
- Slot length: 30 min + 10 min buffer
- Maximum consultations per day
- Booking window (e.g., next 14 days)
- Minimum notice (e.g., 2 hours)

Two-way calendar sync

Personal events from Google Calendar block slots automatically; booked consults appear there with the patient name and join link.

LIFE OF A SLOT

Dosage, use & follow-up

As directed · review at week 8

Recommend & create order

One click creates

- A saved recommendation in the patient file
- A pre-filled order awaiting payment
- A payment link valid for 72 hours
- A WhatsApp + email message to the patient
- A CRM task for sales to follow up if unpaid

Guardrail

The patient is free not to buy. The plan and prescription are theirs either way. Dr. Tyagi's link to the brand is disclosed.

ONE-TAP PURCHASE JOURNEY

No searching, no cart building — five taps to a paid order

Unpaid after 24 h: WhatsApp nudge. After 48 h: sales call. Link expires at 72 h and can be reissued.

Every lead has one status, and the system moves it

Plugs into your existing automation system

Journey	Trigger	Category	Message (gist)
Lead capture	Meta click-to-WhatsApp ad	Marketing	Welcome + book or talk to an expert
Booking	₹500 payment verified	Utility	Confirmed: date, time, join link, ID
Reminders	24 h, 1 h, start time	Utility	Join link and intake checklist
Plan	Doctor clicks Recommend	Utility	Your plan from Dr. Tyagi · Pay & order
Care	Delivery + weekly schedule	Utility	How is the routine going? Reply 1–3
Refill	Plan nearly finished	Utility	Continue your plan · Reorder

Keep service messages clean. In India Meta charges about ₹0.115 per utility message and ₹0.8631 per marketing message. Adding a discount to a reminder can turn it into marketing — 7.5× the cost.

POST-PURCHASE JOURNEY

The relationship starts at delivery

Any reply that mentions a side effect skips automation and goes straight to the care team and Dr. Tyagi.

Remind early enough for the parcel to arrive

Plan end date = delivery date + days of supply. First reminder 7 days before — not 2–3 — because shipping takes days.

One-tap reorder

Same plan, same address, pay by UPI.
Reminders at 7, 4 and 1 day before the end date, then a sales call.

UPI AutoPay subscription

Opt-in monthly plan. ₹5,999 sits under RBI's ₹15,000 limit, so renewals need no OTP after setup.

Guardrails

Bank sends a pre-debit notice at least 24 h before each charge. Pause, skip or cancel in two taps. Offers only where claims are compliant.

Their plan, their progress, their next step

My plan

Products, dosage, days left, usage video.

Consultations

History, notes, prescriptions, book a follow-up.

Orders

Payments, invoices, delivery tracking.

Progress

Monthly scalp photos, private by default.

Reorder & subscription

One tap, or manage AutoPay.

Support

WhatsApp chat, FAQs, raise a concern.

requests

TECHNICAL ARCHITECTURE

One backend, four front doors

Hosted in an India region. Each service sits behind an adapter, so the WhatsApp provider, courier or video tool can change without a rebuild.

The browser never decides that a booking is paid

Every part reads and writes the same record

MARKETING FUNNELS

Two ways in, one consultation at the centre

FUNNEL A · PAID

FUNNEL B · ORGANIC & DIRECT

Every ad and page carries source tags, so revenue can be traced back to the campaign that produced the lead.

CONVERSION FUNNEL

Six numbers that show where customers drop off

Targets left blank on purpose: set them after the first 30 days of real data.

One dashboard, defined the same way for everyone

Acquisition

- Leads by source
- Cost per lead
- Cost per paid consult

Consultation

- Bookings and holds
- Show-up rate
- ₹500 revenue

Commerce

- Consult-to-plan rate
- Average order value
- Revenue by plan

Retention

- Reorder rate
- 90-day retention
- AutoPay share

Team

- Sales response time
- Conversion by rep
- Doctor utilisation

Example definition. Consult-to-plan rate = plans paid within 7 days of a completed consult ÷ completed consults, by week of consult.

Built in from day one, reviewed by counsel before launch

Telemedicine

Show Dr. Tyagi's registration no. on site, prescriptions and WhatsApp. Record consent. Video for first consults where the drug list requires it. Patient may buy from any pharmacy.

Doctor-owned products

A doctor recommending his own brand needs clear disclosure. The 2023 NMC conduct rules are on hold; the 2002 code applies. Confirm with counsel.

Advertising

ASCI has repeatedly flagged hair-growth ads for unproven claims and misleading before/after images. Every claim needs data on file; reviews must be real and consented; guarantee conditions shown in full, upfront.

Patient data

DPDP Rules notified Nov 2025; full duties phase in over 18 months. Clear consent notices, encrypted photos, deletion on request.

FUTURE SCOPE

Designed so these can be added without a rebuild

AI scalp tracking

Compare monthly photos and flag progress for the doctor

Mobile app

Routine reminders and progress in one place

More doctors

Add dermatologists as volume grows

Home lab tests

Blood work partners for root-cause checks

WhatsApp assistant

Answers routine questions; escalates the rest

Marketplaces

Amazon and quick commerce for care products

Loyalty

Rewards for completing a full course

Languages

Hindi first, then regional languages

DEVELOPMENT PHASES

About 17 weeks from approval to launch

Durations are indicative and depend on content readiness from the client and approval turnaround.

Launch what earns money first

MVP — at launch

- Website, product pages, checkout
- Slot booking + ₹500 payment + webhooks
- Doctor Portal: calendar, workspace, recommendation
- One-tap plan payment link
- Guarantee tracking + claim flow
- Sales CRM with auto-statuses
- Core WhatsApp: confirm, remind, plan, refill
- Customer account by OTP
- Admin + basic analytics

Phase 2 — after 60–90 days of data

- UPI AutoPay subscriptions
- Full follow-up journeys with reply routing
- Progress photo tracking
- Advanced analytics and cohorts
- Loyalty and referral
- Multiple doctors
- Mobile app

One loop, run by one system

What we need before design starts

Brand • Logo and variations • Brand guidelines, colours, fonts	Doctor • Professional photos, short video • Qualifications, registration no., bio	Products • Photos, packaging, SKUs • Ingredients, usage, pricing, regulatory category
Trust • Reviews and testimonials with consent • Certifications, lab or manufacturing data, patent details	Business • Company details, address, support • Shipping, refund, privacy, terms	Marketing • Current ads and Meta campaign data • WhatsApp templates and creatives

Nine answers unlock the design phase

#	Decision	Our recommendation
1	Regulatory category of each product	Decides what can be sold without a consult and what we may claim
2	Money-back guarantee terms	Refund amount, time period, eligibility; reviewed by counsel
3	Credit the ₹500 against the first plan?	Recommended: yes, within 7 days
4	Consult cancellation and refund rules	Suggested: free reschedule up to 6 h before
5	Video tool for consults	Recommended: in-portal (LiveKit); Meet as fallback
6	Follow-up cadence and content	Set by Dr. Tyagi per product
7	Subscriptions at launch?	Recommended: Phase 2, after data
8	Which WhatsApp provider is in use	We integrate with the existing system
9	Claims, reviews and photos available	Defines the trust and results sections
